Education

Bachelor of Applied Mathematics and Informatics, FH Aachen, Germany

- FH Aachen, Germany (2022–2024)

- UMI, Morocco (2019–2022)

Technologies

Programming: Java, Kotlin, TypeScript, JavaScript, Python, C++

Frameworks & Technologies: Spring Framework, Spring Cloud, Java EE, Django, Angular, JSP / JSTL, Camunda, Bootstrap 5, Html & CSS

Testing & CI/CD: JUnit 5, Mockito, Selenium, Test-containers, Docker, GitHub Actions, Jenkins (Platform usage only), Git, Gradle (Beginner), Maven, npm, pip

Databases: Consuming MySQL & Oracle / Building Data tables

Used Operating System: Kali Linux, Ubuntu Linux, Raspberry Pi, Bash Scripting.

Others: Full-Stack Development, Web Security, UML & Merise Modeling, CI/CD Automation (GitHub Workflows), Agile Methodologies, Team Collaboration, Unit & Integration Testing

Languages

Arabic, Native

French, Native

English, B2

German, C1

Abstract

Full-stack developer with 2+ years of experience designing, developing, and deploying web applications. Skilled in Java, Spring, and Angular, with a strong focus on clean architecture, performance optimization, and secure coding practices.

Work Experience

MGM Technologies Partners, Germany

Oct 2023- Present

- **Software Engineer,** Public Sector ***(Oct 2024 - Present)***
  - Developed features in a large-scale public-sector project, including associated unit tests.
  - Implemented and enhanced portal functionalities, including UI features, forms, validations, and user interaction workflows.
  - Developed and enhanced permission and consent management functionalities.
  - Improved navigation structures and user interface components.
  - Refactored code to improve readability, maintainability, and performance.
  - Maintained and updated reference data, including validation and correction of related tests.
  - Maintained and updated dependencies in both main and shared repositories across multiple subprojects.
  - Analysed and resolved defects in production and production-related systems.
  - Identified and resolved security and browser-related issues, including Content Security Policy findings.
  - Analysed and remediated vulnerabilities, including CVEs.
- **Backend Developer,** Low-Code Platform A12 ***(Oct 2023 - Oct 2024)***
  - Developed and implemented features within A12, including associated unit and integration tests, and updated related documentation.
  - Refactored existing components to improve code quality, structure, and maintainability.
  - Extended migration tools and supported the execution of workflow and model migrations.
  - Identified and resolved code quality issues, including code smells and SonarQube findings.
  - Optimized integration tests and system runtimes, reducing execution time from 25 to 6 minutes.
  - Conducted vulnerability analysis and remediated security issues, including CVEs.
  - Completed a bachelor's thesis on integrating external payment systems into a low-code platform.
- **Technical Stack:** Java, Kotlin, TypeScript, Spring Boot, JSP/JSTL, Camunda, A12, JUnit 5, Selenium, Gradle, Jenkins, Git, Docker, Stripe & PayPal APIs

Personal projects

- Travel Agency Website
- Car Rental Website
- CVE-2022-30190 (POC)
- Arp Spoof Visualizer
- Student Management
- Pentesting Website

SIJ, FH Aachen, Germany

Feb 2023 - Mai 2023

- **Working Student,** Energy Sector
  - Developed a robust backend server enabling seamless communication with electric stations.
  - Designed and implemented an API to support iOS app integration, allowing precise control over station operations.
  - Created an intuitive administration panel with real-time data communication, providing full control and monitoring capabilities for electric stations and software users.
  - Refactored and migrated code from Python/React to Java/Angular, enhancing system stability and performance.
  - Deployed the solution to a test server for rigorous validation and evaluation.
- **Technical Stack:** Java, TypeScript, Spring Framework, Lombok, GSON, Angular, HTML & CSS, Maven, Git, Docker, MySQL, Modbus TCP, Raspberry Pi
